

Copy Files to a CD with NERO SMART START

- 1 Launch the **Nero Smart Start** program
by double-clicking the Desktop Icon

(or by selecting it from the START menu)

- 2 click on the "type" icon at the top
to select the type of files you are
copying :

If you are copying data, such as
documents or photos, click the
Data icon

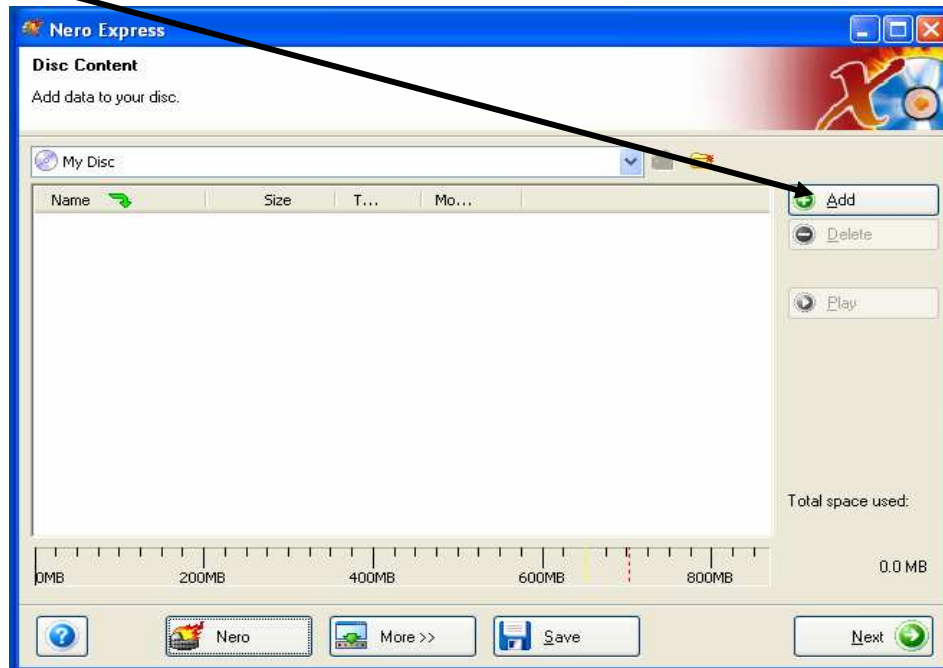

If you are copying music, click the
Audio icon

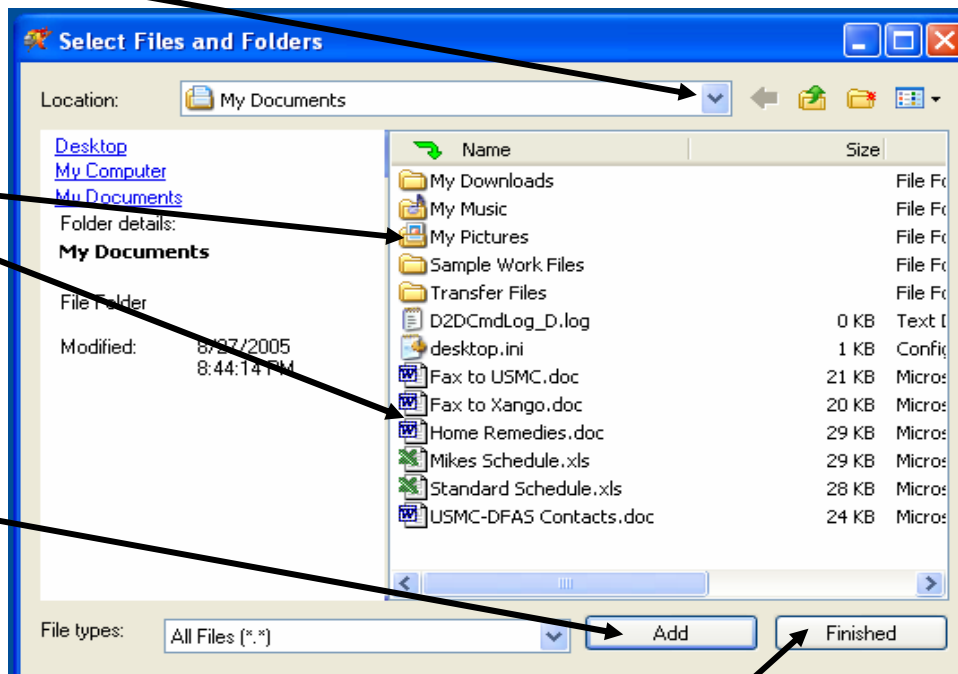

- 3 If you clicked the **Data** icon, then
click on **Make Data Disc**

4 Click the **Add** button, to select which files you wish to add to the disc

5 Look for the files you wish to copy from the list. If you do not find them, click the "drop down box" arrow, and change folders, until you find the correct one

6 Select the **FOLDER** or **FILE** you wish to copy

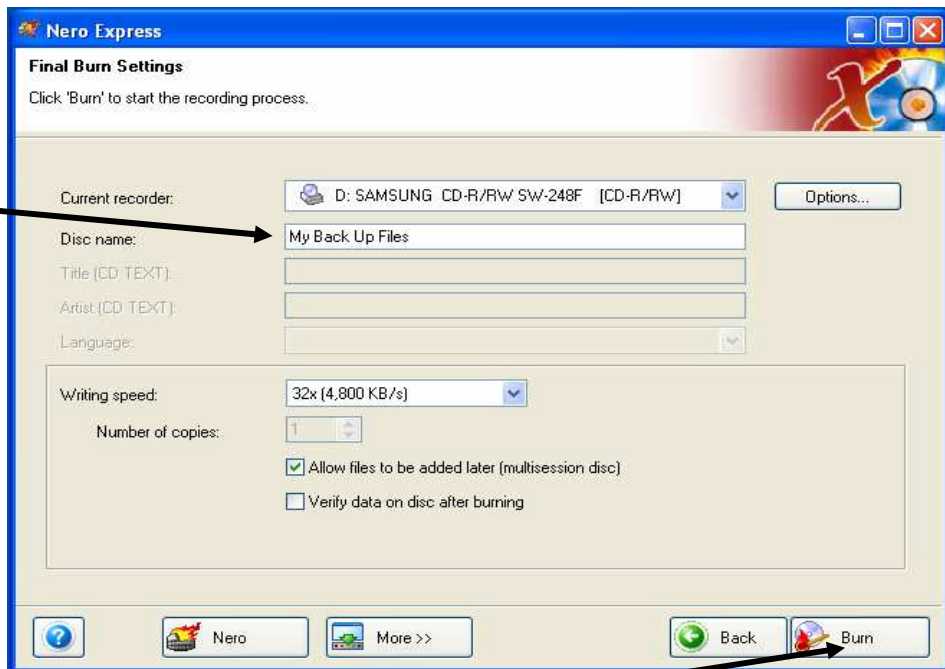

7 Click the **Add** button

Repeat steps 6 & 7 until all files have been selected

8 When all files to be copied have been selected, click **Finished**

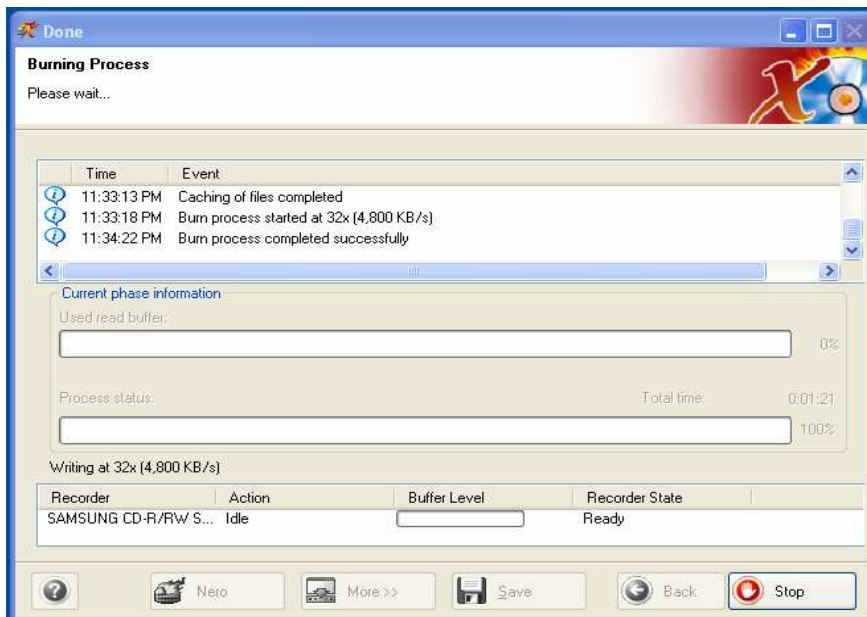

9 Click the **Next** button

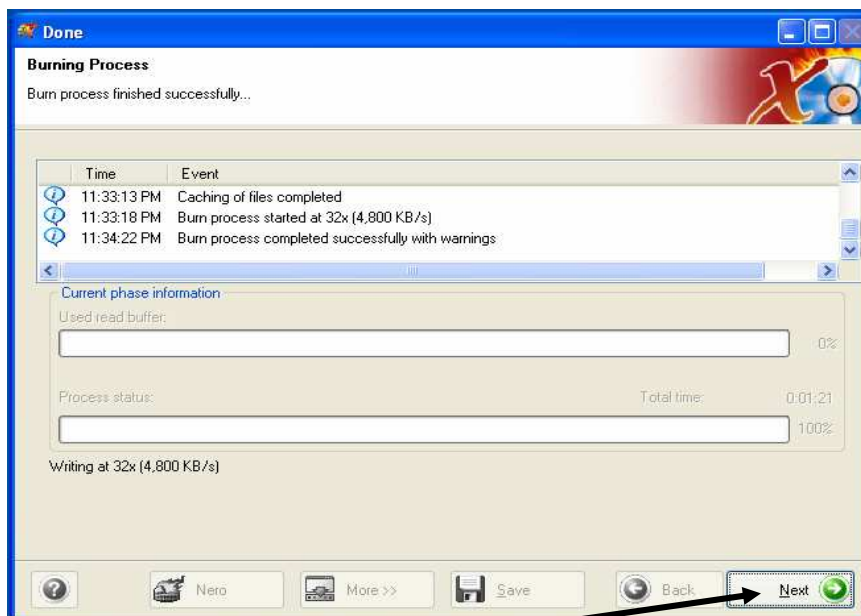

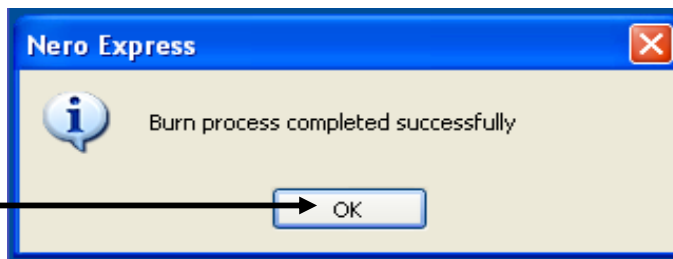

10 If desired, give your disc a name

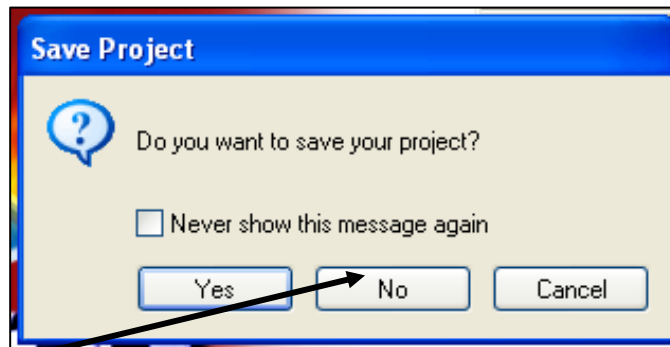

11 Click the **Burn** button

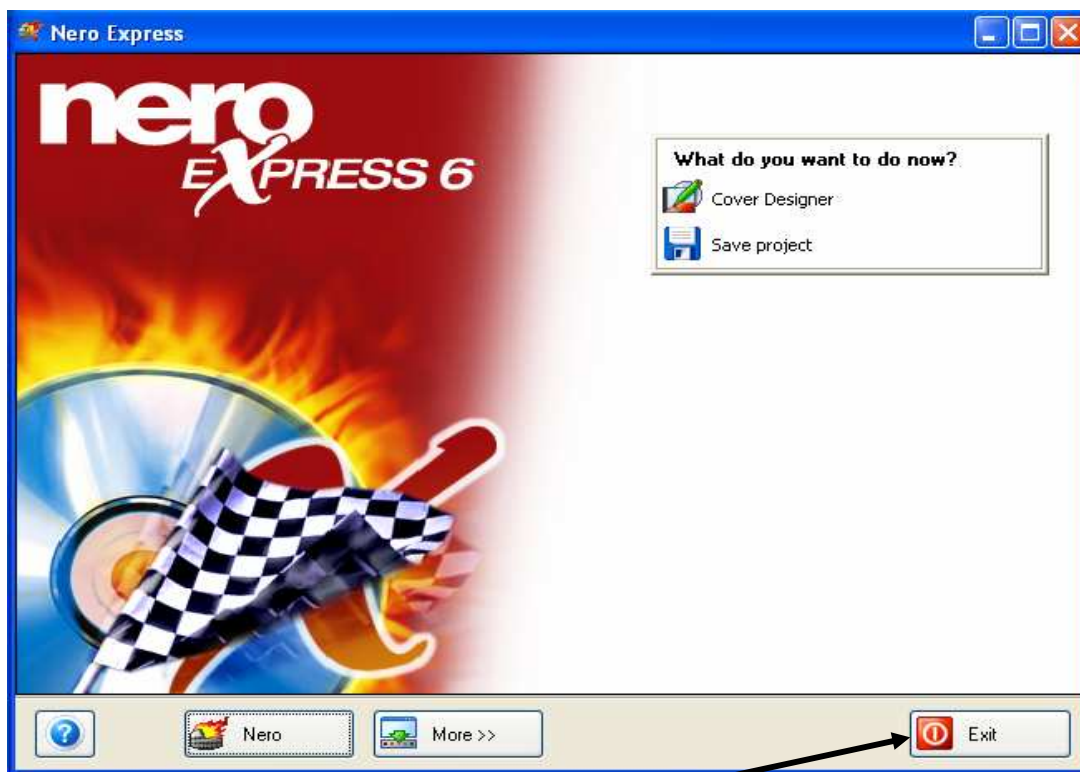

12 Click OK

13 Click the Next button

14 Click **NO** to avoid saving the project to the Hard Drive

15 Click the **Exit** button
